

Collection: 023002; Video Rate:29.97 fps; Master Digital Formats: 1920 x 1080 Uncompressed 10-bit 4:2:2. Prores(HQ); Acquisition Format: RAW Digital

023002-A002C007: Silicone model 24 Week Foetus. Mid shot horizontal. Head right frame. Full face.. Membrane behind. Back and sidelight through membrane . Membrane visible or with dark background Medium particles visible ion the backlight. Moves and holds floating. Camera never static.

023002-A002C012: Silicone model 24 Week Foetus. CU view of feet from below. Foetus facing up with head in background towards top of frame. Rather jerky manipulation and some dirt on soles of feet. Spotlight through membrane. Underlighting semi- endoscopic . Membrane visible or with dark background Water clear with medium particles visible. Moves and holds floating. Camera never static. Jerky manipulation of model.

023002-A002C013: Silicone model 24 Week Foetus. Wide of whole foetus viewed from below looking up towards head.Jerky manipulation. Foetus still to start with and rolls to left of frame at the end. Spotlight through membrane. Underlighting semi- endoscopic . Membrane visible or with dark background Water clear with high density particles visible. Moves and holds floating. Camera never static. Jerky manipulation.

023002-A002C014: Silicone model 24 Week Foetus. Wide view foetus below view with head towards top right of frame. Jerky manipulation but foetus rolls to right of frame. Spotlight through membrane. Underlighting semi- endoscopic . Membrane visible or with dark background Water clear with high density particles visible. Moves and holds floating. Camera never static. Jerky manipulation.

023002-A003C001: Silicone model 24 Week Foetus. Lit membrane behind. CU head and arms/hands. Floating movements with foetus head towards top right of frame. facing camera. Rolls towards camera at end shot. Back and sidelight through membrane . Membrane visible or with dark background Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C002: Silicone model 24 Week Foetus. Membrane folded over face. Face in profile. Foetus rolls away from camera.Foetus lying horizontally with head off right of frame. Back and sidelight through membrane . Membrane visible or with dark background Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C003: Silicone model 24 Week Foetus. View across legs towards feet and membrane. Small movements with slight roll away to present back. Back and sidelight through membrane . Membrane visible or with dark background Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C005: Silicone model 24 Week Foetus. Foetus lying horizontally with head at right of frame. View of trunk with hands travel down to feet and back up again. Foetus facing towards camera presenting front of body. Small hairs visible in water. Back and sidelight through membrane . Membrane visible or with dark background Small shed hairs visible. Moves and holds jerky. Camera never static.

023002-A003C008: Silicone model 24 Week Foetus. Semi wide view looking up at feet and legs. Lighting highlight on feet but some floating hairs visible. Drifts to left of frame. Side and back light against dark field. Water clear with medium particles visible. Moves and holds floating. Camera never static.

023002-A003C009: Silicone model 24 Week Foetus. Short shot foetus tilted slightly right of vertical facing camera. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C010: Silicone model NG. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C011: Silicone model 24 Week Foetus. Foetus tilted slightly right of vertical facing camera. Camera pulls away and down body to feet. Track back to face and down to feet again. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C012: Silicone model 24 Week Foetus. CU head and hands facing camera, head tilted to right of frame. Rolls to left to reveal ear. Long hold and rolls back to face camera. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A003C013: Silicone model 24 Week Foetus. CU head and hands facing camera, head tilted to right of frame. Some nice jerky foetal contractions. Camera moves down body to look up from feet in foreground. More contractions. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A004C001: Silicone model 24 Week Foetus. Body horizontal with head right of frame. Foetus rolls away from camera to show back. Rolls back to profile view arms and head. Foetal contractions. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A004C002: Silicone model 24 Week Foetus. Wide view lower half of body moving in black. Body lying diagonally with head at top right of frame. Starts in profile but rolls to present 3/4 view. Side and back light against dark field. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A004C003: Silicone model 24 Week Foetus. Medium view lower half of body moving against membrane. Body lying diagonally with head at top right of frame. Starts in profile but rolls to present 3/4 view. Active movements. Back and sidelight through membrane. Membrane visible or with dark background. A few particles visible on the backlight. Moves and holds floating. Camera never static.

023002-A004C004: Silicone model 24 Week Foetus. CU face and hands in profile with body diagonal and head towards top right of frame. Active foetal contractions. Membrane visible behind. Back and sidelight through membrane. Membrane visible or with dark background. A few particles visible on the backlight. Moves and holds floating. Camera never static.

023002-A004C005: Silicone model 24 Week Foetus. CU face and hands. Profile view with foetus horizontal. Head towards right of frame. Little activity. Back and sidelight through membrane. Membrane visible or with dark background. A few particles visible on the backlight. Moves and holds floating. Camera never static.

023002-A007C001: Silicone model 24 Week Foetus. CU face. Head top right frame. 3/4 view. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C004: Silicone model 24 Week Foetus. CU face. Profile facing left. Head upright in frame. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C005: Silicone model 24 Week Foetus. CU face. Profile facing left. Head top right in frame. View slightly up body from shoulder. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C006: Silicone model 24 Week Foetus. BCU hands mouth nose. Head top right frame. 3/4 view. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C007: Silicone model 24 Week Foetus. BCU hands with mouth and nose. Head starts horizontal and rotates to top right frame. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C015: Silicone model 24 Week Foetus. Mid view from top of head down to chest. Face 3/4 facing right. Head at bottom of frame. Foetus rolls over to present back view. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C016: Silicone model 24 Week Foetus. Mid view top half of body. Horizontal nearly full face. Head left of frame. Foetus rolls towards endoscope, view of back of ear. Rolls back and wide view of body and feet. Repeat roll moves. Endoscopic lighting. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C024: Silicone model 24 Week Foetus. CU hands through membrane. Horizontal nearly profile. Head left of frame. Backlit foetus viewed through membrane. Light wipes on at start of shot. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C025: Silicone model 24 Week Foetus. Very dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C026: Silicone model 24 Week Foetus. Very dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C027: Silicone model 24 Week Foetus. Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C028: Silicone model 24 Week Foetus. Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C029: Silicone model 24 Week Foetus. Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C030: Silicone model 24 Week Foetus. Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C031: Silicone model 24 Week Foetus. Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C032: Silicone model 20 week Foetus, Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A007C034: Silicone model 24 Week Foetus. Dark mysterious shapes viewed through membrane. Backlit foetus viewed through membrane Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C001: Silicone model 24 Week Foetus. CU over face and body with endoscope in shot.. Head starts top left frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C004: Silicone model 24 Week Foetus. BCU over body down to feet and back to fingers. With head towards top left frame. Endoscope in shot. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C005: Silicone model 24 Week Foetus. CU over feet and up to face with endoscope in shot.. Head starts top right frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C006: Silicone model 24 Week Foetus. Mid view over face, endoscope in shot. Head nearly vertical in frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C008: Silicone model 24 Week Foetus. BCU over face and over to membrane. Return to BCU face and mouth. With endoscope in shot.. Head at top of frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C009: Silicone model 24 Week Foetus. Move backwards up body from umbilicus to head with CU eye. Head facing up with top of head towards bottom right frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C011: Silicone model 24 Week Foetus. Endoscope light only across face. BCU face. Head bottom of frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C012: Silicone model 24 Week Foetus. BCU light only moving over face and hands. Face in profile, head right and bottom right of frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C013: Silicone model 24 Week Foetus. BCU light moving over face. Head bottom right frame. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C014: Silicone model 24 Week Foetus. CU face. Head bottom right frame. Foetus reacts to light by rolling towards camera. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A009C015: Silicone model 24 Week Foetus. CU face profile facing left head nearly vertical. Foetus reacting to light playing over its face. Endoscopic lighting with the endoscope in shot or with the light from endoscope travelling over the body. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A010C001: Silicone model 24 Week Foetus. Foetus viewed through membrane. CU Face 3/4 top from head face towards top of frame. Camera moves to present horizontal profile face (up) and then tip for head to end top right CU profile. Endoscopic lighting Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A010C006: Silicone model 24 Week Foetus. Foetus viewed through membrane. Head upright hand in front of face. Membrane ripples and moves away like a drawn curtain. Endoscopic lighting Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A010C007: Silicone model 24 Week Foetus. Foetus viewed through membrane. Full face hands to left of face. Membrane pulls aside at the end to reveal face. Endoscopic lighting Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A010C008: Silicone model 24 Week Foetus. Front of body viewed from head looking towards feet. Head bottom of frame. Track towards and around feet. Track backwards from feet to head. Endoscopic lighting Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A010C051: Silicone model 24 Week Foetus. Face and hands profile face down in frame pushed towards membrane. Foetus shuffles and moves around. Camera BCU on cheek at end. Endoscopic lighting Some bigger dark particles visible. Moves and holds floating. Camera never static.

023002-A010C053: Silicone model 24 Week Foetus. BCU hands in front of face, eye visible behind. Facing bottom right frame. Hands move around on face. Endoscopic lighting Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A010C064: Silicone model 24 Week Foetus. Track feet to head. Head top left of frame. Foetus rotates from full face to profile during take. Endoscopic lighting Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A020C001: Silicone model 24 Week Foetus. Wide static view of foetus in uterus within membrane. Endoscopic spotlight. Water clear with few particles visible. Moves and holds floating. Camera never static.

023002-A020C002: Silicone model 24 Week Foetus. Closer wide, still whole body, of foetus in membrane. Endoscopic spotlight. Water clear with few particles visible. Moves and holds floating. Camera never static.
